

# Assistive Technology for people with Cognitive Disabilities

- What is Assistive Technology & What does it do?
  - Reads text aloud, reads meanings, changes colors, provides organizational and memory support, may substitute images for words.
  - It is used in the classroom during instruction and assessment and also in the workplace.
- What are some of our problems?
  - Poorly designed content from publishers and content providers
  - An explosion of platforms (disruption)
- How can it move into the cloud?
  - It is moving into the cloud – it needs standards
- Quick demonstration of AT and of AT in the cloud
